

TRANSPORTATION DETAILS OF ORE

The mode of transportation of iron ore lumps as well as fines from mine head will be by road up to railway siding. The capacity of the dumper will be 35T for the purpose. Further, railway sidings located near Roida II Iron Ore Block will also be used for the transportation of ore to the destination.

It has been planned to transport the ore to its end use plants at Dhenkanal (Odisha) and Kandra (Jharkhand) as well as to market for sale in accordance with applicable laws.
