

## Justification for selection of sites in forest areas in Assam

Assam is in the proposed area of the Project "Roll out of the 4<sup>th</sup>. Generation (4G) Broadband Service in India".

The State of Assam has more than 33 % forest cover area.

To make available high speed broadband service in those areas with great values in Term of making essential service available for business, education, healthcare, e- governance nature conservation, safety & security & so on, Reliance Jio Infocomm Limited needs access in forest areas for setting up network for better and effective connectivity.

Object of the project is to cover all remote areas with Jio 4G Broadband Service which uplift the socio economic condition, education etc. Of the people residing at remote areas. To cover up all shadows areas of network, construction of towers at certain interval is essential. As more than 33% areas of the Stata of Assam is under forest cover, desired nominal (latitude/longitude) of the sites as selected considering technical para meter fall with in forest areas, which cannot be avoided for better & effective 4G network. Thus we are in need of those forest land, where proposed nominal falls.
