No.DB 49/PKD 16-17/Dt 21-12-2016

NOTE

Our State Government has declared commitment to electrify all households in state by March 2017. In connection with this total electrification scheme, Five applicants have registered from Variyathukad of Pananchery Village under this office. These applicants have properties at Variyathukadu which is surrounded by reserve forest. They have access to their properties through reserve forest only. Out of this five applicants, Two have residential buildings to which Electric connection has to be effected. For giving Service connection to these houses, 222 mtr Line has to be constructed through reserve forest. For avoiding cutting of trees, it is proposed to construct line using underground cable. The work involved to construct the line is digging a trench of 50 Centimeter width and One meter depth, Laying the Cable and backfilling the trench. It is not expected any work in future as the failure of the Under Ground Cable is rare. There is no other alternate route for giving Service connection to these applicants.

Assistant Engineer
