

JUSTIFICATION FOR LOCATING THE PROJECT IN FOREST AREA

The water treatment plant will be located on the south – western part of Waithoupat Phase – I in an area measuring 12.50 acres (5.00 Ha). At present an area of 2.2 Hectares (approx.) will be filled up for construction of the plant. The treatment site will be accessed from NH-39 by an approach road from the NH-39 to be constructed on acquired land. The treated water will be pumped to 1(One) no. of 6 MLD capacity reservoir to be constructed on Tangjeng Hill top for distribution by gravity to various zones of Thoubal division. For this purpose, an area measuring 0.98 hectares of forest land is required.

The site chosen for location of service reservoir of capacity 6 MLD at Tangjeng Hill top is the nearest elevated spot most suitable for locating the proposed structure. No suitable alternative site is available. The area chosen is also a non residential area. Hence the justification for locating the structure in forest area .

Place : Imphal

Date : 28th December 2015
