Date :- 31.12.2015

To,  
The District Forest Officer,  
Jalgaon

Sub :- Justification of new 33/11 KV Substation & 33 KV Karjana Line project in forest land

In Connection with above subject, following justifications are for the project of erection of new 33/11 KV substation & 33 KV Karjana line which is passing through forest land.

- 1) The tribal villages Karjana, Vaijapur, Melane, Devzari, Bormadi & other small padas are electrically connected with 11 KV line emanating from 33/11 KV Virwade substation. The distance of tribal villages from Virwade is far away i.e approximately 40 km. Hence the line is passing through hilly area, 11 KV line repeatedly breakdown. Hence consumers of the tribal villages get intrupted power supply. Also consumers of tribal villages get low voltage. Hence by doing this project the problem of intrusion of power supply & low voltage is solved.
- 2) By electrifying the tribal villages using new 33/11 KV substation & 33 KV line financial & social benefits will be made available to the people residing in tribal villages. Also there is revenue benefit to the M.S.E.D.C.Ltd.
- 3) This project will help developing the industries, domestic consumer, agriculture consumer & public amenities in tribal villages.

Submitted for your kind information please.
