

JUSTIFICATION FOR LOCATING THE PROJECT ON FOREST LAND

In continuation of the requirement of Environment parameters, construction methodologies to be adopted for different terrain encountered enrooted, design and engineering factors, availability of logistic support during construction and maintenance of approach road, finally after analyzing the various data this route is found feasible to connect the Road. (Bhuj-Anjar Road).

Factors Considered:-

1. Demand and Supply center
2. Compliance with Environment regulations.
3. Minimum demand of forest land.

An effort were made to find out land other than forest land in surrounding are to connect the Retail outlet with Road, but was not possible and there was no other alternative except this for demanding forest land hence the required forest land (0.0955 Ha) is requested to be granted for the purpose of constructiong the approach road (Bhuj-Anjar road). and we undertaking that the used of the protected forest land shoud be as possible as minimum.
