NOTES :-

Heights are in metres and above Indian mean sea level.  
Contours are approximate.  
A relative height, e.g., 50, represents the approximate height, in metres, between the top and bottom of a steep slope.  
The triangulated heights and contours in this sheet have not been adjusted to the heights of the spirit-levelled benchmarks and may not be strictly in accordance with them.  
The kilometre stone numbers along roads and railways are shown in slant type, e.g., '2' whereas milestone numbers are shown in upright type, e.g., '50'.  
Wells are numerous throughout the sheet; only the important ones have been shown.  
Cart tracks and unmetalled roads in this sheet are generally motorable in dry season.  
Permission to use these along canals is required from irrigation authorities.
