

**Site inspection report of the Conservator of Forests in respect of the 0.25 Ha. Forest land proposed to be diverted for the construction of Water Reservoir in Langol Reserved Forest in favour of the Public Health Engineering Department, Manipur**

\*\*\*\*\*

The proposed site for diversion of 0.25 Ha. of forest land for the construction of Water Reservoir at Langol Reserved Forest in favour of the Public Health Engineering Department, Manipur was inspected by the undersigned along with the Divisional Forest Officer, Central Forest Division; Range Officer, Sadar West Range and staffs of Sadar West Range 2<sup>nd</sup> February, 2015.

The site was having around 29 (twenty nine) trees of *Pinus kesiya*. The site had steep slope which is vulnerable to erosion and landslide if adequate retaining wall is not provided.

The Langol Reserved Forests are reported to have Indian Rock Python, Barking deer, Wild boar, etc.

The site doesn't form part of any protected area, heritage site or defence establishments.

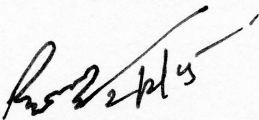

The density of vegetation is moderate with the canopy purely covered by *Pinus kesiya*. Indigenous vegetation was negligible.

The area proposed for diversion was examined with the project proposal and detailed project report and was found to be the barest minimum and at the adequate position.

The undersigned was satisfied with the inspection on need of forest land for diversion and that no adverse impact will be made on diversion of forest land to the inhabiting flora and fauna.
