**Site inspection report of Konar Washery 68.40ha.**

Visited the site on 08.08.2016, first visited the Govindpur patch the latitude and longitude are as follows N-23<sup>0</sup>47'37.49" & E-85<sup>0</sup>54'30.40". The forest is dense and the density is around 0.8 of Eco class III i.e. Tropical dry deciduous forest. The predominant species was found to be Sal and its associates. The forest floor is covered with herbs and shrubs, mainly Asparagus, Eclipta prostrata, Clerodendrom, Phlomis, Baropa monnieri, Withonia somifera etc.

Subsequently, the second patch of forest was inspected the latitude and longitude is N-23<sup>0</sup>47'09.54" & E-85<sup>0</sup>54'34.40" and is situated in village Bermo. The density of forest patch in this area is 0.6 of Eco class-III. However, a small area of 5.84ha of forest land in middle of this patch is left un-diverted. The terrain is hilly area with steep slope.

Divisional Forest Officer,  
Bokaro Forest Division, Bokaro.
