Dated 12.04.2016

Site Inspection Report of Chief Conservator of Forests, Territorial Circle, Hazaribagh

I inspected the proposed forest land of Partango RF situated on north part of the village area on 12.04.2016. The notified forest area of Partango mauza is 88.74 ha. but not demarcated so far. The area is adjacent to the southern part of Domchanch mauza. There are more than a dozen of stone mines still operational on non-forest land of Domchanch mauza. The proposed area is almost devoid of vegetation and prone to illegal mining. I agree with the observations made by Divisional Forest Officer, Koderma Forest Division. Multifold increase in development activities, demand of stone chips has increased tremendously. Acceptance of the proposal will be helpful in controlling the menace of illegal mining in nearby forest areas.

In view of the facts stated above, I agree with the recommendation of Divisional Forest Officer, Koderma Forest Division and acceptance of the proposal is recommended.

Mahendra Prasad, IFS
Chief Conservator of Forests
