

Site Inspection Report

The Chief Manager power grid eastern region Transmission system-I Gaya has submitted a proposal for seeking permission under Forest Conservation Act 1980 for laying out 400/KV double Circle (Quad) transmission line. As per the proposal transmission line pass through Nabinagar to Gaya. The land in question is mostly along the road & river side. Only 1.1546 ha area falls under Aurangabad Forest Division. Only the trees of tar & babool are present in the proposed site plan. No rare/ endangered/unique species of flora & faunas are found in this Site of the road/river. It was also found that no protected archeological/ heritage site fences establishment or any other important monument is located along prepared road.

The transmission line is essential for the inter-state electricity transmission. The land proposed by the user agency is unavoidable and barest minimum for the project Hence recommendation is made for acceptance of the proposal.
