

## SITE INSPECTION REPORT

Inspected the site on 23-12-2017. The proposal is for laying 120m LT single phase 2 wire line and provide electricity connection to Ammayambalamchathuppu under **Total electrification Scheme**. The forest area is moist deciduous natural forest and it is found that the area to be diverted for providing electric line is 0.012 ha. The project involves extending the 120 meters of LT single phase overhead line for providing connection to households. There is no other alternate route with minimum area requirement. There are eight SC families will be benefited by the project. The area does not have rare / endangered / threatened species and is not part of protected area under Wildlife (Protection) Act 1972. No protected archaeological / heritage site/ defence establishment is located in the area. The project is recommended for approval.
