No.G3-1051/17

Date : 10.03.2017

### **Site Inspection Report dated 10.03.2017**

Sub:- Electrification of Kayattuva & Thodakkayam Colonies –  
Proposal from KSEB - reg.

Inspected the site on 10.03.2017. The proposal is for laying underground cables through forest area to enable electrification of colonies from Kayattuva to Thodakkayam.

The total forest area sought for the purpose is 0.006 Ha. The proposed area comes under Mekkappala Forest Station of Kodanad Range under Malayattoor Forest Division. There are 23 families residing in this area without any electricity connection.

The proposed site is a road passing through 1983 Teak Plantation. Since electricity connection is sought to be enabled through underground cables, it is not going to affect the movement of wildlife in the area. No tree felling is proposed for implementing the project.

Since no damage is foreseen on the ecology of the area and because no viable alternative is available for establishing electricity connection to the colonies, the proposal for underground cabling from Kayattuva to Thodakkayam colonies may be favorably considered.
