

## SITE INSPECTION REPORT

Inspected the site on 17-03-2017. The proposal is for laying 700 m LT overhead line having width of 1 m and provide service connection to Cheenikkala SC colony under **Total electrification Scheme**. The area is having plantations of forest area leased to KFDC and it is found that the area to be diverted for providing LT overhead line is 0.07 ha. No trees are to be felled for laying the electric line through the forest area. No harm to forest, flora and fauna will be caused by the project. The area does not have rare / endangered / threatened species and is not part of protected area under Wildlife (Protection) Act 1972. No protected archaeological / heritage site / defence establishment is located in the area. The requirement of forest land as proposed by the user agency is unavoidable and bare minimum. During my inspection, no work in violation of the FC Act or guidelines is seen carried out by user agency. The project is recommended for approval.
