NOTES :-
Heights are in metres and above Indian mean sea level.
Contours are approximate.
A square height, e.g., 200, represents the approximate height, in metres, between the top and bottom of a square area.
Towns shown in this area usually contain water from July to March.
Cultivation is seasonal and dependent on rainfall.
Forest boundaries as shown have not been shown for want of reliable information.
The triangulated heights and contours in this sheet have not been related to the heights of the upland-based benchmarks and may not be strictly in accordance with them.
Cartooned and unmetalled roads in this sheet are generally metalled in dry season. Permission to use these roads for Forest is required from the Forest authorities.
