HEIGHTS & CONTOURS IN METRES
CONTOUR INTERVAL 20 METRES

Water features are shown in blue where they generally contain water. Cultivated areas are coloured yellow. The exterior boundaries of areas of Reserved or Protected Forests are shown by green ribbons.

Contours are approximate. A relative height, *H*, represents the approximate height, in metres, between the top and bottom of a steep slope. Wooded areas are coloured green. Scattered trees and other vegetation are in green, but prominent surveyed trees are in black.

Distance stones are in miles. The district boundary where following the main deep water channel of the Ganga River, will change with the fluctuations of that channel. The area adjoining the Ganga River is liable to change owing to continual fluctuation in the course of the river. Tanks shown dry, in this area, usually contain water from July to April. The district boundary between Meerut and Moradabad has been altered as a result of verification surveys carried out during 1974. Forest boundaries in this sheet have not been shown for want of reliable information.
