No. ONGC/ JRT/HSE/Justification/GGS

Dated: 02.02.2019

From: A K RASTOGI, DGM (P), Head HSE, Jorhat Asset, Assam
To : Nodal Officer, Aranya Bhawan, Panjabari. Guwahati, Assam.
Subject: Justification for GGS.

Dayalpur field is to be developed by ONGC. For development purpose drilling of new wells would be carried out. Oil and Natural Gas thus produced would be collected and processed at GGS. For same surface facility is to be developed. Surface Team after careful consideration has decided that surface facilities would be better at the existing drill site of Suphayam-1.

Suphayam-1 is existing drill site and has exploratory forest clearance. Surface facilities would be developed to separate oil and gas and for storage of oil. Crude oil tankers would be utilized to transfer crude oil to nearest pumping station.

The purpose of creating surface facilities is to develop Dayalpur field which located in the forest area. As a general rule processing facilities should be near to the wells. Since, field lies in the forest area, and oil lies below the forest area, surface facilities is to be created as suggested.

The existing site has got exploratory forest clearance. The surface facilities would be created in existing premises of Suphayam-1, and **NO EXTRA LAND IS REQUIRED.**

Submitted for your information please.
