NOTES:

heights are in metres and above (rain mean sea level).
Columns are appropriate.

A relative height, e.g., of roads: the approximate height, in metres, below the
the top end of a slope above.

The kilometre stage numbers along roads and variables are shown in slant type, e.g., 's' whereas
milestone numbers are shown in upright type, e.g., '6'.

Centricity and unmarked roads in this sheet are generally incommensurate in dry season. Permission to use
those along roads is required from Imperial authorities.

A relative height, e.g., of marked roads, indicates the height of the top of the canal embankment
above the export country.

Tanks, shown dry in this area, usually contain water from July to January.

Wells are numerous throughout the sheet, only the Imperial ones have been shown.

ILATION INDEX

A Modsim survey 10/3-74. Updated for major details during 2005-09.

Projection - UTM Datum - WGS 84

Magnetic Variation from True North about 0° in 2005.
