JUSTIFICATION

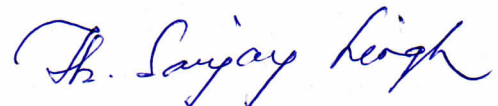

There are many developmental projects targeted to be implemented in the local demand of road, railway-line fitting as well as to supply to the various government, semi-government and private agencies for the construction of civil works, in play-ground filling, embankments for roads, flood banks, marginal banks, and guide banks etc. In the state of Manipur. There is a demand of stone products and murum like road metals, stone chips of different sizes in the Imphal valley and adjoining hill areas.

The proposed quarry site (Area : 5.345 Ha.) is located at Kotlen in Longa Koireng Village, P.O Langjing, P.S. New Keithelmanbi, Kangpokpi District, Bishnupur Forrest Division, Government of Manipur.

Further to specify the justification of the project, the demand of earth material has been increased but the legal supply is very less in the state of Manipur. If this project is approved then the demand can be met under legal regularization, legal royalty, landslide control in these area, generate direct and indirect employment and ultimately it is the benefit of the environment.

The approval of this project with stipulated conditions as per its applicability will regulate the unscientific excavation and ultimately the surrounding geological can be maintained.

Hence we seek to approach the Forest Department for the Forest Clearance.
