### NOTES

Heights are in metres and above Indian mean sea level.  
Contours are approximate.  
A relative height, e.g., 30, represents the approximate height, in metres, between the top and bottom of a steep slope.  
A relative height, e.g., 30, against a well, indicates its total depth in metres.  
Tanks shown dry, in this area usually contain water from July to September.  
Most of unlined well symbols indicate covered tanks, called kunds, which usually contain surface collection of rainwater.  
Cultivation is periodic and dependent on rainfall.  
Unmetalled road and cart-tracks in this sheet are generally motorable in dry season.  
Diggr is a tank which is used for collection of water.  
Hand pump is shown thus.  
Pyls is a place where there is an arrangement for serving drinking water.
