### Case 1: Electrification of 3 houses in Annunda Forest area

This Annunda forest area is in Akampadam Village of Chaliyar Grama Panchayath, Malappuram district. For the electrification of 3 houses (BPL applicant -1, APL applicant -2) inside this forest area, 0.225 km LT single phase OH line is to be constructed through the forest land and no tree cutting is needed. Construction of OH line through private land is also necessary, which will be done immediately, after getting this forest clearance. These 3 houses are surrounded by forest area and there is no other way for drawing the line for giving service connection to these 3 families. So this route through the forest is proposed.
