

## JUSTIFICATION

HVPNL is constructing a 220 KV D/C transmission line from 400KV S/Stn Deenapur to 220KV S/Stn Sec-6 in Sonapat area. The construction of the line is very critical to improve the power supply position in Sonapat & nearby areas. The proposed route is most feasible and necessary forest land has been avoided, but while crossing Roads, Canals etc. it is not possible to avoid the forest land alongside with it. So the minimum forest land has been used for the construction of the transmission line & also it is stated that this route is most appropriate route.
