NOTES

Heights are in metres and above Indian mean sea level. Contours are approximate. A relative height, e.g., 5', represents the approximate height, in metres, between the top and bottom of a steep slope. The kilometre above numbers along the railway are shown in slant type, e.g., '5' whereas milestone numbers are shown in upright type, e.g., '5'. Unmetalled roads and cart-tracks along canal embankments are usually motorable. Permission to use these is required from the irrigation authorities. Other unmetalled roads in the sheet are motorable in dry season. A relative height, e.g., 5', marked along a canal, indicates the height of the top of the canal embankment above the adjacent country. Tanks, shown dry, in this area usually contain water from July to January.
