Rehabari, Guwahati-781008

Sub: Alternate route selection and Comparison with proposed route in Geleky Reserve Forest.

Sir,

It is to bring to your kind notice that the Concern Forest Land at Geleky Reserve Forest is covered with Jungle with undulating terrain with height difference of more than 40 to 50 mts. The present routes are aligned close to the existing road running to the ONGC well side having fairly flat and side slopes and minimum cutting of forest trees are required. The area of Alternate route inside Reserve Forest is more than the proposed route parallel to road and alternate route also passes through undulating terrain.

The proposed routes are the best route having minimum impact on environment and with minimum tree cutting..The alternate routes runs through rugged terrain and nos of trees cutting will be maximum.

Regards

Jyotsna Pegu
