NOTES

Heights are in metres and above Indian mean sea level.
Contours are approximate.
The kilometre scale numbers along roads and canals are shown in solid type, e.g. '5' whereas milestone numbers are shown in upright type, e.g. '5'.
A relative height of 6 ft. marked along a canal indicates the height of the top of the canal embankment above the adjacent country.
Tanks shown dry in this area, usually contain water from June to February.
Numerous wells exist throughout the sheet, only the important ones have been shown.
Unmetalled roads, in this sheet, against which there is no descriptive remarks, are generally notifiable in dry season.
Cart track along Lohia Left Main Canal is prepaed in dry season. Permission to use this is required from the irrigation authorities.
The triangulated heights and contours in this sheet have not been adjusted to the heights of the spirit-levelled bench-marks and may not be strictly in accordance with them.

COMPILED INDEX

A. Compiled from 1:25,000 survey 1977-78. Updated for major details during 2004-05.

Projection - UTM Datum - WGS 84

Magnetic Variation from True North about 1° West in 2005. Decreasing by about 1" annually.

1:50,000

500 m to 1 cm 2 cm to 1 km

CONTOUR INTERVAL TO METRES
