heights are in meters, and above Indian mean sea level.

Continents are approximately

A relative height, h , represents the approximate height, in meters, between the top and bottom of a steep slope.

Forest areas in this chart are projected.

All uncontrolled lands in this chart are vulnerable to dry season.

A relative height, e.g., h , marked along a contour indicates the height of the top of the contour on the adjacent country.

The area adjoining the Blue River is built in stages using a combined hydraulic and the river.

Contour lines are in feet below sea level, and are marked only by the local officials on the
