NOTES -

Heights are in metres and above Indian mean sea level

Contours are approximate

A relative height, e.g., 10, represents the approximate height, in metres, between the top and bottom of a steep slope

The triangulated heights and contours in this sheet have not been adjusted to the heights of the spirit-levelled bench-marks and may not be strictly in accordance with them

The kilometre scale numbers along roads are shown in cart type, e.g., 12 whereas milestone numbers are shown in upright type, e.g., 5

Unmetalled roads in this sheet are generally not suitable for dry season

A relative height, e.g., 30, against a well indicates its tidal depth in metres

Names in this sheet are usually current water front, July to December

Cultivation is periodic and dependent on rainfall

The common boundaries of the Reserved Forests between Choptadi Rf & Dhumkal Rf and Jharwani Rf & Rajpipla Rf in squares B12 and C12 have not been shown for want of reliable information
