NOTES :-

Permission to use cart-tracks and unmetalled roads along canals and protective embankments is required from the irrigation authorities.

Tube-wells are numerous throughout the sheet, only the important ones have been shown.

Dams, shown dry, in this area usually contain water from July to March.

Distance shown between a few canals is 1 mile and 1,000 metres apart and every existing one is shown whereas along other canals/drains, these are 1,000 feet apart and every existing fifth stone is shown.

A relative height, e.g., 6r, marked along a canal, indicates the height of the top of the canal embankment above the adjacent country.

A relative height e.g., 8r, represents the approximate height, in metres, between the top and bottom of a steep slope.
