REFERENCE

NOTES :-
His is in metres and above Indian mean sea level.
Tours are approximate.

Native height, h_z , represents the approximate height of mature, standing trees. The height of the forest canopy is shown by green ribands. The vertical boundaries of the areas of Reserved or Protected Forest are shown by green ribands. The areas usually contain water from July to December. The areas that have not been verified by the authorities concerned, are marked with a question mark. The forest is reserved for the use of the local official authorities. The forest is generally accessible in dry season. Permission to use those land is granted by the local official authorities. The forest is generally accessible in dry season. Permission to use those land is granted by the local official authorities.

COMPIATION INDEX

A. Compiled from 1:25,000 survey 1979-80. Updated for major developments during 2005-06.

Projection - UTM Datum - WGS 84

Magnetic Variation from True North about $\frac{3}{4}$ West in 2005.
