

CHECK LIST NO. 10

JUSTIFICATION FOR LOCATING THE PROJECT IN FOREST AREA

The catchment area of stream above the diversion structure mainly comprises of forest land. The slope of stream for 1:20 to 1:60 which is an ideal condition for hydro power electric generation. The natural regime of the stream is not being disturbed as a raised crested weir with non over flow and over flow section has been proposed and the water after generation of electric power would be released back into the river.

No other viable alternative available for the project, so it has to be such be located into the forest land. Before finalizing this layout, three alternatives has been explored and one conveying minimum disturbance to the local population and forest area with minimum no. Of trees is selected, keeping in view the other technical parameters required for the construction of the project. The same has also been certified by the concerned Divisional Forest Officer and Sub- Divisional Officer (Civil) during the joint inspection of the project site on dated (certificate enclosed on page no.....)
