

### **JUSTIFICATION**

The Kauncha village is inhabited with Tribal population and agriculture is the main occupation of the people. At present , there is no direct connectivity to Kauncha village from Dudhani due to the Daman ganga river which passes in between both the villages, this causes huge inconvenience to the public in any emergency need of medical attention. The Administration has provided boat service through our department , but without direct connectivity , there is a lot of inconvenience to the poor Tribal public of Kauncha.

In response to the difficulties, the department has proposed a high level bridge between the two villages. The reconnaissance survey has been carried out for the bridge. The feasibility study was also done on the various options and the proposed alignment was found to be shortest and feasible. The approach of bridge on the both the banks of Dudhani and Kauncha falls under forest area. There is no alternate route except the proposed route.

By constructing the above mentioned High level bridge across the Daman ganga river , the emergency facilities such as Medical can be duly attended by the Administration within short time.

  
(Shri.S.S Bhoya)  
Executive Engineer,  
PWD Civil Div. No.II ,  
Road Division,  
U.T. of Dadra & Nagar Haveli.

**Name of work** :- Diversion of Reserved forest land for Construction of High Level Bridge joining Dudhani and Kauncha village across river Daman Ganga.

**Date** :- 17/03/2017.

**Place** :- Silvassa.
