NOTES :-  
 Heights are in metres and above Indian mean sea level.  
 Contours are approximate.  
 A relative height, e.g., 5, represents the approximate height, in metres, between the top and bottom of a steep slope.  
 All cart-roads and unmetalled roads in this sheet are generally mettable in dry season. Permission to use these roads is required from the irrigation authorities.  
 The revised heights and contours in this sheet have not been adjusted to the heights of the approved benchmarks and may not be steady in accordance with them.  
 The milestone stone numbers along roads, railways and canals are shown in plain type, e.g., '1' whereas milestone numbers are shown in script type, e.g., '1'.  
 The area adjoining the Ghaghara river and Saryu Nadi are liable to change owing to continual fluctuations in the course of the river.  
 Table-sets are numbered throughout the sheet; only the important ones have been shown.  
 Forest boundaries and their pillars shown in this sheet are of unclassified forests.  
 Tanks, shown dry in this area, usually contain water from July to December.
