

JUSTIFICATION for temporary diversion of Forest Land (20.37Acre).

Due to high population density, religious places and school around the Hariya Forest area the alignment of new railway line which connects Araria to Thakurganj passes through this restricted forest area. This forest area involves 20.37Acre of land. This forest area also connects Araria and Araria court station. However, due to non-availability of land around the project area there is no other option than to propose diversion of forest land for this purpose.

The above forest land has been identified at Hariya falling under Araria forest division. This forest area is near to Rahamatpur station (B class station). There is huge population and religious places surrounding the locality. The proposed Rahamatpur station is surrounded by a no of thickly populated villages.
