

COST BENEFIT ANALYSIS OF THE PROJECT

This project would immensely helpful to enhance power scenario in Lumding and surrounding area by quality power transmission and would also provide stable and uninterrupted power to the area and also reduce distribution losses. It would also helpful to improve overall power scenario of the rural areas and the whole region. This project is therefore taken for promoting better infrastructure development and is being funded under AIIB.

Estimated monthly Revenue of minimum Two Crore may be earned under these transmission lines.
