NOTES:-
Heights are in metres and above Indian mean sea level.
Contours are approximate.
A relative height, e.g., 5, represents the approximate height, in metres, between the top and bottom of a steep slope.
Tanks, shown dry, in this area usually contain water from July to December.
Fertile on the Ghaghara River only take pedestrian traffic.
The kilometre stone numbers along the railway, drain and roads are shown in slant type, e.g., '5', whereas milestone numbers are shown in upright type, e.g., '5'.
The area adjoining the Ghaghara River is liable to change owing to continual fluctuation in the course of the river.
Unmetalled roads and cart-tracks, in this sheet are generally motorable in dry season.
Permission to use those inside the Reserved Forests is required from the Forest authorities.
Wells are numerous throughout the sheet; only the important ones have been shown.
The district boundary in the Ghaghara River follows the main deep water channel and not the fluctuation of that channel.
