REFERENCE NOTES

Heights are in metres and above Indian mean sea level. Contours are approximate. A relative height, e.g., 10, represents the approximate height, in metres, between the top and bottom of a steep slope. The kilometre scale numbers along roads, railways and canals are shown in upright type, e.g., '5' whereas kilometre numbers are shown in upright type, e.g., '5'. Unimproved roads and roads in this sheet are unimproved in dry season. Permission to use these above altitudes is required from the highest authorities. Wells are numerous throughout the sheet; only the important ones have been shown. A relative height, e.g., 10, marked along canal, indicates the height of the top of the canal embankment in the adjacent country. The common boundaries of the Reserved Forests in this sheet, have not been shown for want of reliable information. Tanks, shown dry in this sheet, usually contain water from July to January. The district boundary in the Ganga River follows the main deep water channel and will change with the fluctuations of the channel. COMPILED INDEX
