NOTES

Origins are in Europe and above Indian Ocean sea level.
Coastline are approximate.
Tides shows dry in this area usually occurs more from July to March.
Unsettled (cloudy and part-bathic) in this place are generally noticeable in dry season. Permittivity in an
other place needs to respond from the irregular activities.
A relative height, e.g., is marked along a coast indicates the height of the top of the coast sometimes
above the adjacent country.
L1000 are transmittance values of Waters Test Pressed Barriers and test facilities are shown in table
(each-meter) (see ...) (see ...) (see ...)

COMPLATION INDEX

4. Surveyed during 1995-96; stocked for major stocks during 2005-06.

Projection = UTM Datum = WGS 84

Magnetic Variation from True North about $\frac{1}{2}^\circ$ East in 2000

(averaging to about 2 months).

1:50,000
