

Justification for locating project Site

Name of Work: Widening & Strengthening of Lucknow-Sitapur Road Km. 489 to Km. 493

Lucknow-Sitapur Road is the part of old NH-24 City portion. This road starts from Madion police station & end at Hazratganj chauraha in Lucknow city i.e. from Km. 488.725 to Km. 499. This road bisects the populated area of Lucknow city (North) i.e. 10.275 Km. long stretch laying with in thickly populated area & carries heavy traffics along with other mixed type of traffic.

The stretch between Km. 489.725 to Km. 492.500 i.e. total length 2.775 Km. is proposed to be widen because in this portion Naveen galla mandi is situated between Daliganj flyover & Purania flyover. The side lanes of Purania crossing is narrow due to this through traffic amalgamated & creating heavy traffic Jams, which is regular feature of this road

This stretch carries heavy traffic of NH-24 as well as local mix type of traffic, hence existing 17.00 m with divider has been widen to 21.00 m i.e. 2m-2m on both sides to convert in 6 lane to meet the requirements of traffic proposed as per IRC guide line with strengthening & other improvement.
