Justification for locating the project in Forest land

The 10LL capacity overhead service reservoir is proposed at pampa for improving the storage facility of drinking water at pampa area. The present drinking water storage capacity available at pampa is only 3LL. This is not at all sufficient for feeding the pilgrims halts at pampa during Mandala Makaravilakku Festival season.

At Pamapa and Sabarimala area, no land other than forest land are available for constructing the OHSR. Hence the Minimum land area of 0.07Ha required for locating the OHSR in the forest land at Pampa is requested.
