NOTES :-

Height are in metres and above indian mean sea level.  
Contours are approximate.  
A relative height, e.g., 30, represents the approximate height in metres, between the top and bottom of the contour.  
The state boundary between Madhya Pradesh and Maharashtra State has been surveyed as pointed out by the local officials on the ground but has not been verified by the Governments concerned.  
Unmetalled roads, in this sheet against which there is no descriptive remark, are generally motorable in dry season.  
In Marathi names the letter 'h' frequently the sound of 'r'; invariably the sound of 'c' and 'v' invariably that of 'w' when initial, and of 'w' when otherwise placed.
