Notes on the map and above the map are as follows:
The kilometre scale running along roads and canals are shown in blue type, e.g. 1.5
A relative height e.g. 50, marked along a road indicates the height of the top of the road
at the point shown above the figure in the column.
Tides, when dry in this area, usually subside water from June to February.
Narrower water level throughout the sheet, only the important ones have been shown.
Unimproved roads, in the above, which there is no descriptive remark, are generally
maintained in dry season.
Centred along Loda, left Main Canal is located in dry season. Permission to use this is required
from the respective authorities.
The projected heights and contours in the sheet have not been adjusted to the heights of the
spot-levelled bench-marks and may not be in accordance with them.
