

Up-gradation to 2 lane with paved shoulder configuration of Gadchiroli-Sironcha of NH-353 C in the State of Maharashtra by Ministry of Road Transport & Highways from Ashti to Sironcha in Gadchiroli District of State of Maharashtra .

Annexure 1

NOTE ON JUSTIFICATION FOR LOCATING THE PROJECT IN FOREST AREA

Existing road is passing through dense forest of Eco-Class 3 . The widening is proposed on the same central line of existing road except small curve improvement and realignment at few places to reduce the curve for safety point with less forest land and within the proposed ROW. There is no other alternatives but to strengthen existing road with minimum forest land involvement which need diversion for non forestry use under Forest Conservation Act 1980. Widening of existing road is passing through ranges of Sironcha Division. Village wise ,Range wise, and Tauka wise forest land is furnished in following table.

Summary of Sironcha Division														
Sr no	Taluka	Village Name	Range	Chainage	Comp.No.	Survey No. / Gut	Forest Area				Legal status			
							Length in Mtr.	Width in Mtr	Area in Sqmt.	Area in Ha

For widening the existing road, diversion of above forest land of the existing road plus additional land required for the purpose of widening will be required under Forest Conservation Act. Since the forest involved in the existing road does not have any notification on disforestation ,entire ROW of 22 has been considered for diversion as per the guidelines of Ministry of Environment , Forest and Climate Change . .

ROW PROPOSED FOR THE DIVERSION PURPOSE:

1. It is proposed to divert forest for the road in width of 11 meter from central line on each side for the entire alignment and therefore the trees are to be cleared in the 22 meter. Efforts would also be made to save the trees in shoulders.
2. In the ESZ (Parnhita) patches in the alignment , no widening work is proposed unless necessary recommendations from NBWL is obtained & therefor Forest Land diversion excluded in ESZ .

Therefore the requirement of forest is minimum for the purpose of project. It is site specific project due to up-gradation of existing road only and hence justified.
