

(iii) Cost of the project.	2836.00 Crores
(iv) Justification for locating the project in forest area.	<p><b>Tetar Reservoir Area</b> - The region is surrounded by mountains on three sides, which are excellent for reservoir construction naturally. With the construction of this reservoir, the ground water level of this region will improve, which will also benefit the rest of the forest.</p> <p><b>Abgila Small Reservoir cum Water Treatment Plant Area</b> - After stone excavation in this area, there is a pit of about 25 meters, which is perfect for building small reservoirs. Also, being close to the city, it is also mentioned for water treatment plant.</p>
(v) Cost-benefit analysis (to be
