NOTES :-

Heights and Contours have not been shown.
Tanks, shown dry, in this area usually contain water from July to December.
A relative height, Δ , represents the approximate height, in metres, between the top and bottom of a steep slope.
Forest areas in this sheet are Government Reserves. Their boundaries are not delineated in some cases but have been surveyed as pointed out by the local officials. The common boundaries have not been shown for want of reliable information.
The sheet has been compiled from 1:25,000 survey with additional alterations in respect of forest boundaries with their names and connotations, power lines and other minor details on the basis of verification surveys carried out during 1979-80 and 1988 respectively.
