NOTES :-

Heights are in metres and above Indian meters (see level).
 Contours are approximate.
 A relative height, e.g., α , represents a absolute height, in metres, between the top and bottom of a steep slope.
 Car-tracks and unmetalled roads in the sheet are generally motorable in dry season. Permission to use these roads during rains is required from Impressariat.
 Wells and tube-wells are numerous throughout the sheet, only the important ones have been shown. Tanks shown dry in this area, usually contain water from July to March.
 Farms on the Gomati River only take paddy cultivation.
 A relative height, e.g., α , marked along a canal indicates the height of the canal embankment above the adjacent canal.
 This sheet has been compiled from 1:25,000 survey.
