## FOR LAYING STEEL GAS PIPELINE ALONG JINNARAM AND BONTHAPALLY RFs

1. M/s TGPL is planning to supply Piped Natural Gas (PNG) to various industries in Jinnaram which includes areas like Vadepally and Bonthapally for which we are proposed a request to lay 8 - Inch steel pipeline through the Reserved Forests (RFs) of Jinnaram & Bonthapally.
2. The Industries that we have targeted by M/s TGPL includes Lee Pharma Ltd. , Symed Labs, Granules Ltd. , Neulands Laboratories Ltd. , Honour Labs, Sundaram Fasteners, etc. among many other industries located around the forest area.
3. Our City Gate Station (CGS) through which we plan to supply to gas to various industries is already under construction. Thus, we intend to commission our gas pipeline as early as possible for revenue generation.
4. On the other hand, even the households in the surrounding areas will be benefited as we also plan to lay MDPE (Medium Density Polyethylene) pipes to the industries and the households which are in need of PNG.
5. Hereby, we conclude that the laying of steel gas pipeline is necessary along the proposed route so as to provide this essential public utility for the needy.
6. Thereby the details of the route has been assigned below in a map:
