NOTES >>

heights are in meters and above bedrock mean sea level.

Contours are approximately:

- inner station circles are 5,000 foot apart and every station 100 feet in diameter.
- Takes about 2 yr. in the area usually center about from July to December.
- Floods were numerous throughout the area, only the important ones have been shown.
- Unimproved roads and can-tracks in the area are generally indicated by thin lines. Permission to use these along creeks is required from the irrigator authorities.
- At relative height 100', the maximum height, is marked between the top and bottom of a steep slope.

3,000 = an interpretation of the data from the Project Survey with the numbers are shown as arbitrary bench marks. U.S. 100, 200, 300

COMPILED BY J. H. HARRIS

A. Surveyed during 1999-00. Updated for major events during 2000-08.

Projection - UTM Datum - WGS 84

Magnetic Variation from True North about 1° East in 2000.

1:50,000

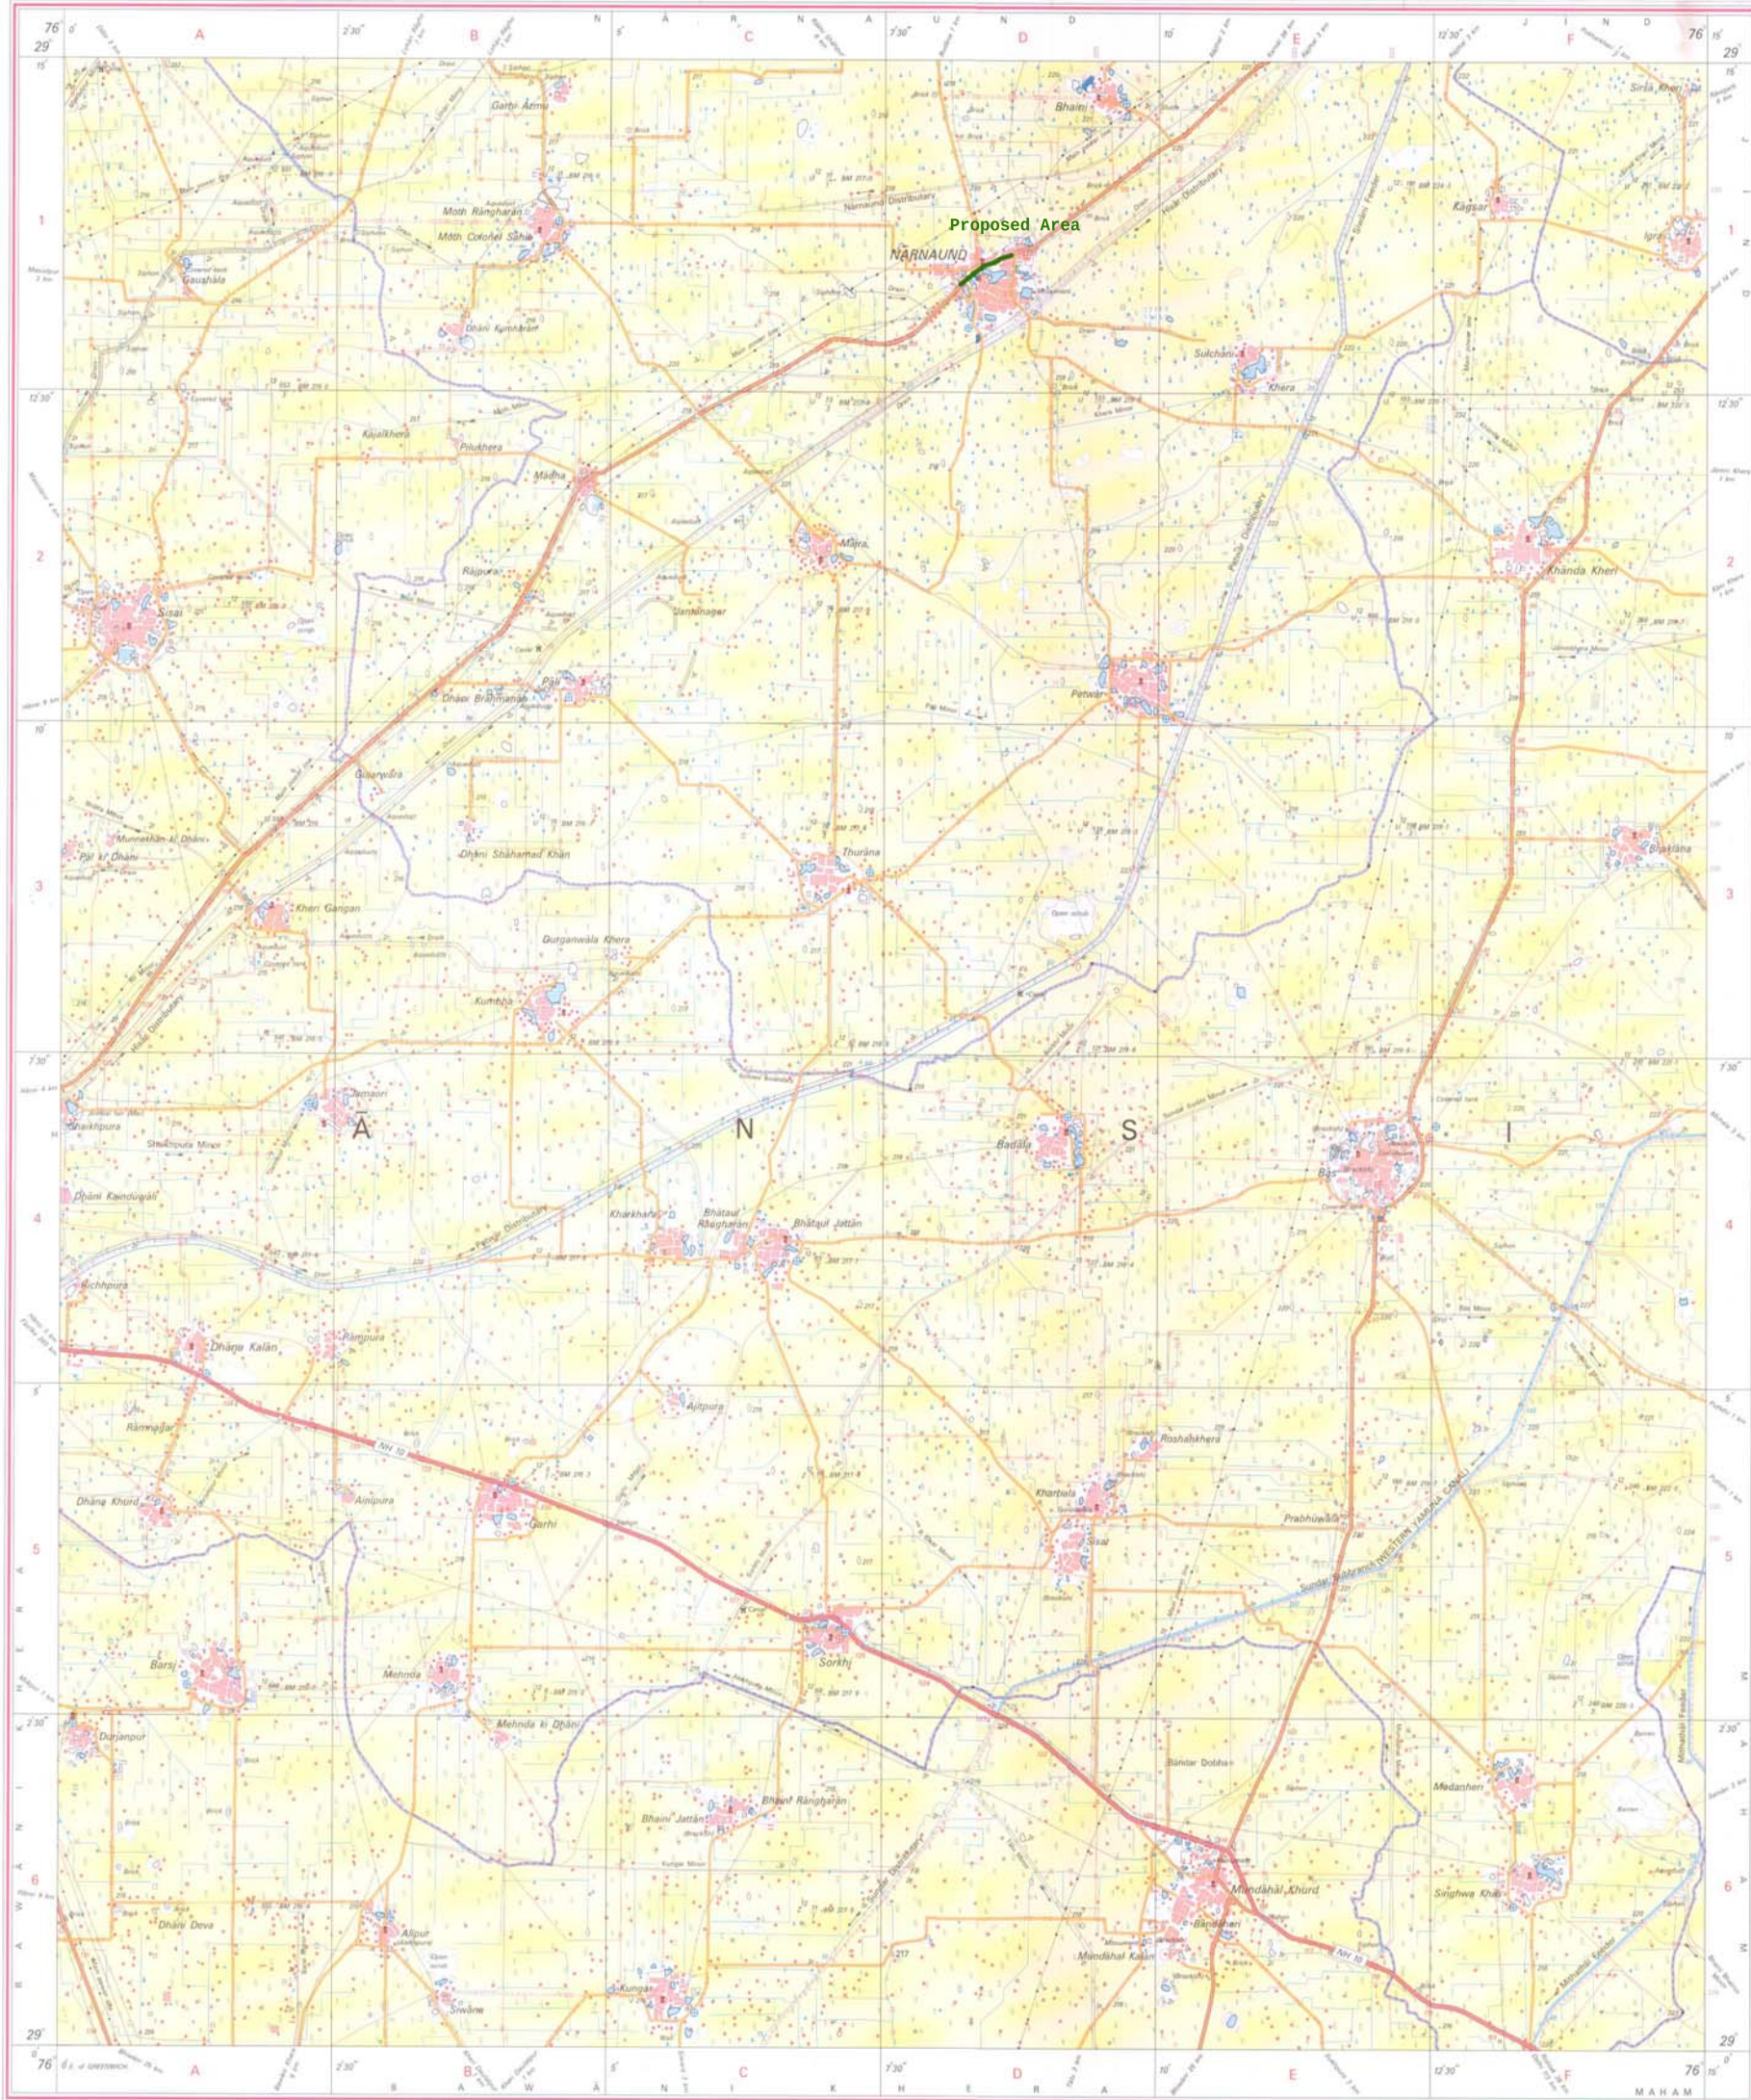

CONTOUR INTERVAL 10 METRES
