NOTES

Heights and contours have not been shown.

A relative height, or, represents the approximate height, in metres, between the top and bottom of a steep slope.

Reliefs are numerous throughout the sheet; only the important ones have been shown.

Towns shown in this area, usually contain water from July to December.

Unsurfaced roads in this sheet are generally metalled to dry season.

The area adjoining the Rāmanga River is liable to change owing to continuous fluctuation in the course of the river.
