The course of Satluj River is liable to continual change owning to shifting of the river bed. A relative height , *&r* , represents the approximate height, in metres, between the top and bottom of a steep slope. A relative, e.g., *.3r* , marked along a canal, indicates the height of the top of the canal embankment above the adjacent country. The places of Antiquarian importance falling in square numbers A/2, C/2 and D/2 belong to Moghal period. These are protected monuments maintained by Archaeological Survey of India. The administrative boundaries and names have been brought up-to-date to 2007.

Projection – UTM Datum – WGS 84 Magnetic Variation from True North about  $1\frac{1}{4}^{\circ}$  East in 2005. (Increasing by about 1' annually).
