

JUSTIFICATION CERTIFICATE

The proposed 132KV DC/SC Transmission Line is crossing the Kondaveedu Reserve Forest, now using this proposed area for the functions of nursery works which is recently proposed for Nagaravanam/city forest, near Ameenabad beat, in compartment No. 127 upto an area of 0.51Ha only. All routes were identified and not possible for construction of 132KV DC/SC line except this forest route because there is no alternate route due to the development of constructions in Guntur corporation limits. So we could not able to avoid the forest land totally and the proposed crossing is unavoidable and **bearest** minimum quantity.

Hence, it is proposed to direct 0.51Ha Forest land for construction of 132KV DC/SC Transmission line at compartment No.127 near Ameenabad beat, in Kondaveedu Reserve forest in Guntur district.
